USEPA SDWA-UIC-IR-14-001
New Installation/Closure Plan for Robert Moses State Park, NYSOPRHP**

Dear Lisa,

Attached please find the Draft UIC New Installation/Closure Plan for the Robert Moses State Park on Long Island. The plan is being submitted to meet the requirements promulgated under the Safe Drinking Water Act regulations for new installations (40 CFR Part 144.83) and for injection well closures (40 CFR Part 144.89). The New York State Office of Parks, Recreation & Historic Preservation plans to upgrade all large capacity and non-large capacity cesspools to sanitary systems with appropriately-sized septic tanks and leaching areas, decommission and close sanitary systems no longer in use, install new systems with septic tanks and leaching areas, and repair septic tanks.

All work will proceed in accordance with the USEPA Region 2 Guidance Document, Instructions for Class V Remediation/Closure Plan dated March 16, 2015, and New York State DEC requirements for installation of new sanitary systems. Upon completion of construction, a "Final Remediation/Closure Plan" and updated EPA inventory forms will be submitted to document the final site as-built conditions.

If you have any questions regarding the plan, please do not hesitate to contact me at 631-321-3533 or scott.fish@parks.ny.gov, or Thomas LaGuardia, P.E. at Cashin Associates, P.C. at 631-348-7600 or tlaguardia@ca-pc.com.

Very truly yours,

Scott Fish
